

# The New Creatives

A fantastic opportunity for your Year 11 *Gifted and Talented* students to explore creativity through scientific academia.

**March 2014**

The New Creative's will give students the opportunity to explore the creative aspects of some of our most Academic courses.

Students will take part in three practical and creative workshops within three departments: Computer Science, Psychology and Biomedical Sciences. Workshops will last up to 90mins with an introductory session about the University and an overview of the courses.

The aim is to explore how creativity and academia work alongside and what the future holds for creative's in Science. Students will leave understanding not only new subject areas, but also how science can open many doors in the future.

There are places for three schools to bring twenty *Gifted and Talented* students. And they will be allocated on a first come, first served basis.

This event is run by the Arts Outreach team and is based at the Colchester campus.
