

## #iLRN16\_SFP - A Micro-SFP Competition (just for fun!)

This form is designed to help you write, a  $\mu$ SFP (micro-SFP), describing an innovation in the area of Immersive Education. The challenge is to describe and motivate your idea in just 20 words (or, to be more exact, 129 characters, since these  $\mu$ SFPs are written for Twitter tweets (a tweet is 140 characters but some are used for the hashtag, #iLRN16\_SFP, leaving just 129 for your  $\mu$ SFP). Generally there are three components to such  $\mu$ SFPs; the <u>technology</u>, a simple <u>action</u> and a <u>person</u> composed as follows.

Person] in [Situation] uses [Innovation] to achieve [Action (with Benefit)]

Name

Jack (fall asleep in the sun) His

Innovation

Situation

Situation

Woke him up with an alarm & soft

vibration (He avoids sun strokes!)

Benefit

More information on writing µSFPs is available from http://www.creative-science.org/activities/microsfp/
